9-18-9 Foliar Fertilizer

Guaranteed Analysis

Nitrogen (N)	9%
Phosphate (P²O⁵)	18%
Phosphorus (P)	8.73%
Potash (K²O)	9%
Potassium (K)	8.3%

9-18-9 is a highly refined foliar product containing a broad range of secondary and micro nutrients derived from marine sources. Due to its very pure ingredients, up to 94% can be absorbed and translocated throughout the plant (turf, trees, shrubs, vegetables, orchards or field crops) within 48 hours. Certified as a food supplement, it is completely safe.

Turf - 5 gals. per acre diluted 1:1 once per month while growing. (6-8 times).

Ornamentals - (Trees, Hedges & Shrubs) – Mix 1 part 9-18-9 to 100 parts of water and apply prior to and following blossom on flowering plants. On non-flowing plants, apply after pruning, or during July and September for trees.

Vegetables & Gardens - Mix 1 part of 9-18-9 with 50 parts of water and spray lightly every 2 weeks once there is enough foliage.

Additional Recommendations for a wide range of plants are available by contacting Green Pro Solutions, LLC at (866) 609-4172

Apply when leaf surfaces are damp, not during the heat of a hot day. Always use hardness-corrected water (5 grains [87ppm] or less) and implement Soil Test Recommendations. To correct hardness, contact Green Pro Solutions, LLC

CONDITIONS OF SALE

NOTICE: The manufacture, distributor, dealer or seller makes no warranty or guarantee concerning this material, its effectiveness, or use, except that it conforms to the label description. The manufacture, distributor, dealer or seller shall not be held responsible in any manner for the personal injury, property damage, or other loss resulting from the use or storage of this product. The foregoing is a condition of sale accepted by the buyer.
