Bio-Tea

Natural Micro-organisms & Supporting Food Sources

It is impossible to have **Healthy Plants** without having **Healthy Soil** . . . and **Healthy Soil** is only possible if the **Beneficial Soil Biology**, critical to so many processes, is present and functioning at the required levels. Bio-Tea has two components which are mixed together just prior to making the applications. Once mixed together they must be applied within 24 hours, but aeration is not needed and regular spray application equipment can be used. Bio-Tea is a practical and cost-effective alternative to brewed compost tea.

Soil ProVide™ is a solution of stabilized, liquid biology teaming with microorganisms. Soil organisms and microbes support plant health as they decompose organic matter, cycle nutrients, enhance soil structure and control the populations of soil organisms, both beneficial and harmful (pest and pathogens).

Bio-Soil Connect is made of decomposed organic matter, humic acid and enzymes which aid in the breakdown of proteins. These components are also food sources for the soil's macro and microbiology which is why Soil Bio-Soil Connect is added to Soil ProVide™ to stimulate and 'wake-up' the microbes.

Suggested Uses and Directions for Bio-Tea

Lawns

Two (2) gallons of Soil ProVide™ and One (1) pound of Bio- Soil Connect will treat one acre of turf.

Use enough water to carry the mixture down into the soil. [40 - 50 gallons]

If possible, irrigate before and after the application or apply during or just prior to a rainfall.

Two applications per season are recommended and may help reduce/control some turf diseases.

Herbacious Plants - 1 gallon pots

4 fl.oz. ProVide + 2 oz. Connect @ 4-6 weeks

Woody Plants - 1 gallon pots

4 fl.oz. ProVide + 2 oz. Connect @ 4-6 weeks

Trees & Shrubs - per 100 sq.ft.

2 fl.oz. ProVide + 1 oz. Connect @ 4-6 weeks

Flower & Vegetable Gardens - per 100 sq.ft.

1 fl.oz. ProVide + 1/2 oz. Connect @ 4-6 weeks

By using the appropriate amount of water as a carrier, Bio-Tea can be used as a soil drench, a soil injection or as a foliar application

CONDITIONS OF SALE

NOTICE: The manufacture, distributor, dealer or seller makes no warranty or guarantee concerning this material, its effectiveness, or use, except that it conforms to the label description. The manufacture, distributor, dealer or seller shall not be held responsible in any manor for personal injury, property damage, or other loss resulting from the use or storage of this product. The foregoing is a condition of sale accepted by the buyer
