Oxygen 8

LIQUID, NATURAL SOIL AERIFICATION & REJUVENATOR

PURPOSES OF Oxygen 8:

- To alleviate soil compaction without the use of mechanical devices that can compact soil after repeated use that has contributed to “Black-Layer” problems.
- To get oxygen (air) to penetrate the entire soil surface to regain soil equilibrium and to promote and further support macro and micro organism life within the soil.
- To promote the health of the turf naturally through increased availability of both applied nutrients as well as nutrients that have been locked up within the soil for various reasons.
- To increase the sugar content of the turf in order to provide greater stress tolerance.
- To increase both root elongation and root mass for a better foundation for the turf’s health, even under close and frequent cropping, such as on golf greens.
- Detoxify soil pollutants – neutralize anaerobic “Black Layer” problems.
- To re-create soil balance between macro and micro soil organisms, which should lead to a decrease in nematode problems and disease outbreaks.

SPECIFIC USES and APPLICATION RATES:

Natural Soil Aerification and Rejuvenation for fine turf areas including golf course greens.

Use monthly through the first season.

Under severe situations (hard soil, over-chemicalized soil, nematode infested soil, “Black Layer” problems... use monthly until conditions improve.

Under less severe situations, or as a maintenance procedure after the first year... use 2-4 times each season.

Mix only enough to apply to the area to be covered.

Apply all Parts per individual package directions.

Apply within 24 hours of mixing.

NOTE: For extreme conditions, doubling of each product can be considered.

PACKAGE CONTENTS:

Part One: (2 - 2.5 gal jugs)

Complex Carbon/Minerals/Growth Stimulants

1. Humic Organic Acid
2. Fulvic Organic Acid
3. Ulmic Organic Acid
4. Minerals
5. Amino Acids
6. Carbohydrates
7. Cytokinins
8. Gibberellins
9. Plant nutrients from decomposition
10. Enzymes

Part Four: (Packet of dry material)

1. Calcium
2. Nitrogen

Part Two: (Packet of dry material)

Microbes-24 species
Including Bacillus Azotobacter
and Clostridium species

Part Three: (Packet of dry material)

Elemental Carbohydrates

Notice: Condition of Sale

The manufacturer makes no warranty or guarantee, expressed or implied regarding this material, its effectiveness or use except that it conforms to the label description. The manufacturer, dealer, distributor or seller or their agent shall not be held responsible in any manner for personal injury, property damage or other loss resulting from the use or storage of this product. The foregoing is a condition of sale accepted by the purchaser.
