## Bio-Soil Science

# Bio-Brew Soluble Seaweed

Bio-Brew Soluble Kelp is an excellent source for dozens of micro nutrients and trace elements. In addition, kelp supplies critical growth auxins and enzymes to promote and encourage the root growth of any plant. When used in the process of brewing or applying compost tea, soluble kelp will greatly multiply and support beneficial microbes.

**Caution:** Keep Away From Children

Store in a cool, dry location out of direct sunlight.

**Net Wt.**
